

# DT: Weaving Challenge

To make a piece of woven fabric, you will need one item from each list.

## to make the loom:

- Cereal box
- Wire coat hanger
- Hoop
- Sticks (twigs)

## Materials to weave with:

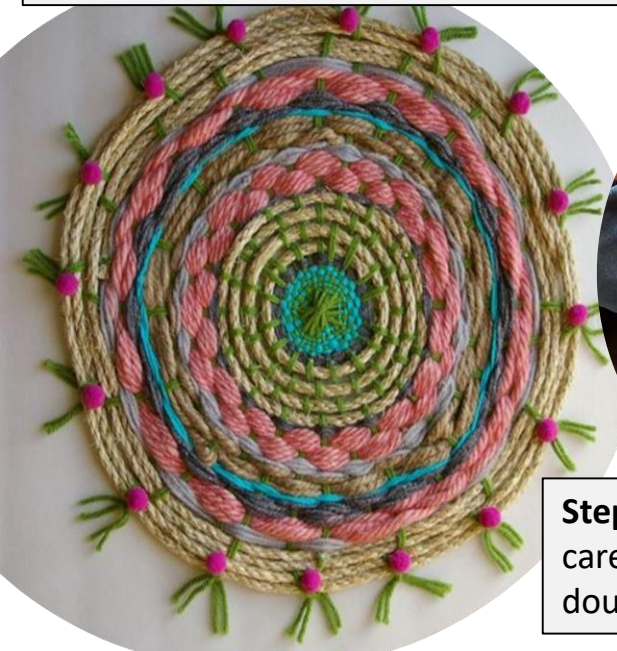

- Paper/magazine papers
- Strips of carrier bag or recycling bag.
- Strips of old fabric (could be clothes or bedding you do not use anymore)
- Wool

**Step 1:** make a loom using one of the suggested materials and thread your loom. This means creating tight threads that you will weave in and out of and will form the basis of your fabric. It can be any shape you like!

**Step 2:** Use materials of your choice to weave through your warp threads. Be creative and think about how you could combine texture and colour. Don't forget to tie the ends to the loom so the weft threads don't fall out.

**Step 3:** Finally, if you choose to remove the loom, carefully tie the warp threads together in pairs using double knots.
